High Tensile C Purlin	Equivalent to ASTM A446 Gr. B			450	345		12	0.40	-	-	0.20	0.04	-	-	-	-	-	

NOTES :

- The impact properties of steel qualities JR and J0 are verified by laboratory testing only when specified at at the time of the inquiry and order.
- The steel qualities J0 and J2 can be produced upon request with extra cost.
- (N1) Test piece No. 11 and 12
- (N2) Test piece No. 5
 - When the tensile test is carried out on No. 5 and 12 test piece for the tube under 8mm in wall thickness, the minimum elongation value shall be determined by reducing 1.5% per 1mm of decrease in wall thickness from the values given in the Table above and rounding off the value obtained to integer in accordance with JIS Z 8401.
- t - thickness
 CHS - Circular Hollow Sections
 RHS - Rectangular Hollow Sections
 SHS - Square Hollow Sections
